

BUSINESS START-UP **QUICK GUIDE**

CITY OF LAKELAND • BUSINESS DEVELOPMENT

AVOID THESE COMMON MISTAKES:

UNDERCAPITALIZATION

Not having enough start-up money and operating without a budget.

PICKING THE WRONG TEAM

Choosing a partner, an accountant, an engineer, a contractor or an employee is often the most important decision you can make for your business. Choosing the wrong team is the single costliest error an entrepreneur can make.

JUMPING AHEAD

Never sign a lease or agree to purchase a property without fully understanding the scope of work needed to complete your project.

DEVIATING FROM YOUR BUSINESS PLAN

Develop a business plan and stick to it, a well-developed business plan should be the backbone of every new business.

AVOIDING NEW TECHNOLOGY

As small business owners, technology can provide new opportunities, help us do our work more efficiently and even help us save money.

BEING AFRAID OF MARKETING

There are no set rules when it comes to marketing; the best type of marketing for you depends on your business and your target audience. The mistake is assuming you don't need to market and that business will come to you.
